- Download the software to change the word. It's called :

- First decompress the compressed package, open the files inside to use, the software name:
- :
- The software function is shown below:

- The software can only be used on a Windows computer. First turn on the name plate, plug the USB cable into the USB port on the name plate, and connect the other end of the USB cable to the computer

- Precautions for use::
- 1. Two switches on the badge, one is the power switch, the other is the program/brightness adjustment button, tap to select which program to display, long press to adjust the brightness
- 2. Regarding charging, the name plate can be charged directly with a 5V mobile phone charger, the new name plate can be charged when it is turned on or off, according to the difference between the charger and the data cable selected when charging, the charging time of the ordinary battery version is generally 3 hours to 6 hours, and the charging time of the large battery version is about 4 hours to 8 hours.
- 3. Keep the name plate dry and clean, because there is a lithium battery inside the name plate, if there is water or other conductive liquid into the new version of the name plate should be immediately open the shell inside the water or other liquid dry or sun dry, generally will not affect the use of. If the badge is in a wet state for a long time without treatment, it will lead to corrosion of the internal lines and component pins, and ultimately cannot be repaired!
- 4. Avoid using at too high or too low temperatures, which may damage the battery in advance and deform the plastic shell or PVC film!
